"BAYER CROSS" ON ASPIRIN

Always -Ask for Genuine "Bayer Tablets of Aspirin"

Only Aspirin Tablets with the safety "Bayer Cross" on them are genuine "Bayer Tablets of Aspirin," owned and pour made by Americans and proved safe by tor me millions of people. Unknown quantities 7 of fraudulent Aspirin Tablets were sold of recently by a Brooklyn dealer which proved to be composed mostly of Taleum Powder.

"Bayer Tablets of Aspirin" should always be asked for. Then look for the safety "Bayer Cross" on the pack- five age and on each tablet. Accept nothing else! Proper directions and dosage in the each Bayer package.

Aspirin is the trade mark of Bayer in Manufacture of Monoaceticacidester of Salievlicacid.

SAGE AND SULPHUR DARKENS GRAY HAIR

It's Grandmother's Recipe to Restore Color, Gloss and Attractiveness.

lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is mussy and troublesome. Nowadays, by asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this famous old recine, improved by the addition of other ingredients at a small cost. gradients, at a small cost.

tended for the cure, mitigation or prevention of disease.

STOP A MOMENT! LISTEN TO THIS

Cincinnati man tells how to lift off any corn without hurting one bit

You reckless men and woman who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati authority to use a drug called freezone, which the moment a few drops are applied to any corn, the soreness is relieved and soon the entire corn, root and all, lifts out with the fingers.

It is a sticky substance which dries the moment it is applied and is said to simply shrivel the corn without inflaming or even irritating the surrounding tissue or skin. It is claimed that a quarter of an ounce of freezone will cost very little at any of the drug stores, but is sufficient to rid one's feet of every hard or soft corn or callus.
You are further warned that cutting at a corn is a suicidal habit.

IF BACK HURTS USE SALTS FOR KIDNEYS

Eat less meat if Kidneys feel like lead or Bladder bothers you-Meat forms urie acid.

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need a flushing occasionally, else we t we backache and dull misery in the ladacy region, severe headaches, rheutic twinges, torpid liver, acid stomach, plessness and all sorts of bladder-dis-

You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Saits from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with Whia, and is harmless to flush clogged lidners and stimulate them to normal activity. It also neutralizes the acids in the urine so it no longer irritates,

thus ending bladder disorders. Jad Salts is harmless; inexpensive; make; a delightful effervescent lithiawater drink which everybody should take now and then to keep their kidneys clean,

thus avoiding serious complications. A well-known local druggist says he sells lots of Jad Salts to folks who believe in overcoming kidney trouble while it is

ELECTRICITY.

My It is Difficult For the Layman Understand What It Is.

"What is electricity?" is a favo: Ite query with people who desire to "get a rise" out of a scientific man And when he fails to answer it i the same simple fashion that I might treat the question "What · biscuit?" the questioner cries out "Aha! You profess to know a about electricity. Why, you can even tell what it is!"

Now, to "tell what a thing is" that is, to define it-is to state it relations with something more fmiliar. The particular familia thing that the questioner in think ing of in this case is ordinary ma ter. the has been explained a him . , a soluration of material par ticles latt, he has been told, was . w nion in the ether, and he under to the other to be a kin of marter or a substance resem

It is not to be denied that no can be stated between electricity and matter. But, this being so, it would be just as correct to say that we do not know what matter is as that we do not know what electricity is. As a matter of fact, we do not know what matter is, and the latest plausible theory of it builds It up on an electric basis, so that on this theory the idea of electricity is more fundamental than that of matter. Unfortunately our senses have been evolved by contact with matter and are trained to detect only matter. Electricity they know only secondarily, through its action upon matter-the light or heat that it causes matter to give out, the .ttraction that it causes certain substances to exert, and so on. To the man in the storet, therefore, matter is familiar, and he demands a statement of the latter in terms of the former, illogical though this may be. After the scientist has stated all this the reply comes back, "Yes, I understand all that, and it is most clear, I am sure, but tell me, then, what is electricity anyway?"

Another source of confusion tthe lay mind is that scientific me do not always use the word "ele tricity" to mean the same thin The engineer often employs it ! express the thing that the theory ical electrician calls "electric en

To find the energy of electricity -that is, its ability to do wor! the electrician multiplies the quite "Farming, for one thing, must be tity of electricity by the potential or tension under which it exits But to the engineer this product itself measures the thing that 1 calls "electricity."

The work that a pound of was may do by falling a foot is one fo pound. The water is the same aft falling as before, though its ener; is less. No to the electrician quantity of electricity at 100 vol is precisely the same a at one tol though the former healte to do hundred trees as much work.

This difference in meaning cauthousands of disputes among st. dents. "Dectricity is a form or heat." . "Oh, no!" is the repl "It is not energy at all, though may possess or convey energy." One disputant is talking about the electricity of the physical and the othe about that of the engineer; hence definition, though they do not know it. What wonder that some people culture prevailed. The reflex action of a re still comtant to regard the whole sabi st to e ei lize I Mumbo Jon. fof St L is ter bli_

> How Beminoles Bury Their Dend. Seminoies bury their dead on top of the ground after wrapping them in blankets, but always leave the top of the head exposed. They build a pen over the body and usually chink it with earth. When his squaw dies the hurband wears his shirt until it rots off, which is not strikingly distinctive. When the husband dies the squaw doesn't comb her hair for three months. Little reverence is shown for the dead. When Tom Tiger's grave was robbed and his bones taken for exhibition the out cry over the desceration was almost wholly a newspaper affair. The nearest settlers were unalarmed and the Indians indifferent -- Collier's Wookly.
